

MANSEHAJ PREET SINGH

Punjab, India | +91-78886-55097 | sehajpreetsingh480@gmail.com | linkedin.com/in/mansehajpreet | github.com/Mansehaj12

PROFESSIONAL SUMMARY

Computer Engineering undergraduate (TIET, 2027) with a strong passion and analytical mindset for data analytics, statistical modeling, and data visualization. Proven ability to collect, clean, and interpret structured and unstructured datasets to deliver actionable business insights. Highly skilled in SQL, Excel, and Power BI with hands-on experience building interactive dashboards and predictive pipelines. Global Kaggle Expert (Dataset & Notebook tiers) with an NVIDIA certification in Deep Learning. Eager to contribute to AppZime Technologies as a Data Analyst Fresher, leveraging data-driven decision-making to automate reporting and drive business scaling.

EDUCATION

Thapar Institute of Engineering and Technology (TIET) — Patiala, Punjab
Bachelor of Engineering in Computer Engineering (COE)

Aug 2023 – May 2027

TECHNICAL SKILLS

Data & Analytics	SQL (MySQL, PostgreSQL), Excel, Google Sheets, Power BI, Tableau
Languages & Libs	Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, Plotly), R, JavaScript, C/C++
Core Competencies	Data Cleaning, Exploratory Data Analysis (EDA), Statistical Modeling, Quantitative Analysis
Databases & APIs	MySQL, PostgreSQL, Relational Database Design, REST APIs
Tools & Methodologies	Git, GitHub, VS Code, Jupyter Notebook, Render, Vercel

KEY PROJECTS

PowerMRO: Industrial Equipment Health Dashboard | *Next.js, TypeScript, Recharts*

[GitHub](#) [Live](#)

- Designed and developed a Maintenance, Repair, and Overhaul (MRO) simulation dashboard to visualize key performance indicators (KPIs) and operational health metrics for industrial assets.
- Engineered a real-time telemetry data pipeline to process and clean multi-sensor telemetry datasets (vibration, temperature, pressure), implementing automated threshold alerts.
- Developed predictive analytics modules utilizing statistical trend analysis to calculate asset degradation rates and predict Remaining Useful Life (RUL).
- Implemented dynamic, interactive data visualizations using Recharts to present fleet downtime trends, fault distributions, and financial repair metrics.

GameIQ: Player Behavior Analytics Platform | *Python, Flask, Scikit-learn, Random Forest*

[GitHub](#) [Live](#)

- Conducted extensive Exploratory Data Analysis (EDA) and data cleaning on a complex dataset of 90,000+ users to extract key churn and retention drivers.
- Automated the data ingestion, feature engineering, and model training pipelines in Python to transform unstructured logs into highly structured analytical models.
- Engineered predictive analytics models using Scikit-Learn (Random Forest) to forecast player churn with 86.8% accuracy, translating predictions into actionable business insights.
- Designed and deployed an interactive analytics dashboard to present player behavior metrics, retention trends, and KPI visualization for data-driven decisions.

Weather Data & Environmental Trend Dashboard | *JavaScript, REST APIs, HTML/CSS*

[GitHub](#) [Live](#)

- Developed a responsive analytics platform to fetch, parse, and analyze real-time multi-source environmental datasets using external REST APIs.
- Engineered data extraction workflows in JavaScript to clean and transform raw API responses into clean formats for time-series trend analysis.
- Implemented dynamic DOM components to visualize atmospheric trend reports, including temperature gradients, humidity profiles, and precipitation profiles.
- Designed robust error handling and input validation checks to prevent runtime failures due to missing data points or incomplete API payloads.

ACHIEVEMENTS & CERTIFICATIONS

- Kaggle Expert:** Ranked Expert tier globally with consistent top performance in ML and Data Science competitions; 80%+ progress toward Master rank across Datasets and Notebooks.
- NVIDIA Deep Learning Certification:** Completed NVIDIA DLI — Fundamentals of Deep Learning (Coursera), covering neural network architectures, training optimization, and inference.
- Competitive Programming:** Solved 200+ Data Structures & Algorithms problems, demonstrating strong problem-solving and debugging skills.
